

PDF Import Crashes Corel 2019

Offline [drizzy77](#) 7 months ago

Hi, I'm trying to import a PDF (from the U.S. patent office), but every time I try to import, Corel Draw 2019 hard crashes. Closes the program. I've tried 5 times, tried rebooting my PC, etc.. but nothing helps. I've attached the PDF. I'm importing as "text" and "comments on separate layer"
